

WESTERN RED CEDAR

APPLICATIONS

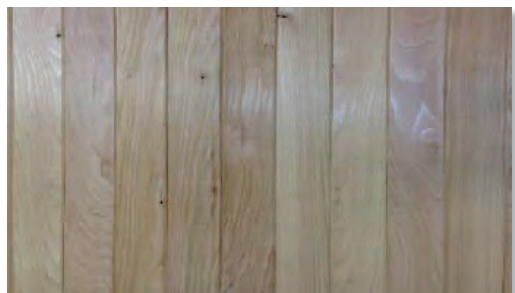

Cedar is lightweight, easy to work with and has minimum tendency to shrink, twist or cup. It seasons easily and quickly, and provides a superb base for stain or paint. An excellent choice for paneling, siding, decking, fencing and fascia, pergolas, out-lookers and gazebos. When properly finished, cedar will maintain its beauty for many decades.

PREMIUM BLEND - Our premium blend cedar has been hand selected for its unique visual blend of color, character and visual appeal.

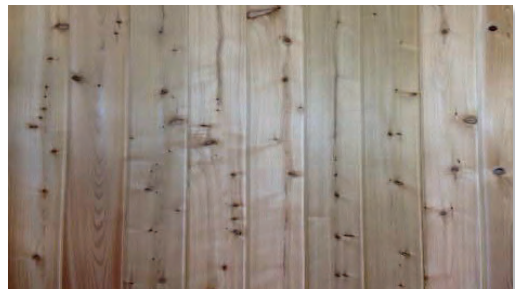

Known for its extremely fine, even grain and rich coloring, Western Red Cedar is as versatile as it is beautiful. Renowned for its high impermeability to liquids and its natural phenol preservatives, its natural resistance to moisture, decay, and insect damage, makes it the ideal choice for locations where humidity is high.

AVAILABILITY

SELECT RUSTIC - has been hand selected for its visual appeal and rustic appearance.

Both grades stocked in 1" and 2", 8' - 20' lengths. Custom milled patterns available upon request.
